greetings Larshan and Anh-Nhi

at the board meeting for the Swedish Society for EM (SWESEM), we have unanimously made the formal decision to support your network i.e you may now formally state that our Society supports/ endorses you

also, we have decided to look into the regulations for how to make it possible for medical students to become members of SWESEM, (in turn resultated by the National bodies, Svenska Läkarsällskapet and Svenska Läkarförbundet, since we are members of these national medical organisations)

According to their, hence also our statutes I do not think it possible for medical students to become full members, rather affiliated members. I will look in to this since I believe it is imperative that medical students become members.

Also, a more formal organisation of medical students for EM within SWESEM is of interest

all the best
lisa

Lisa Kurland
